

Writing in LaTeX

Renu Ojha

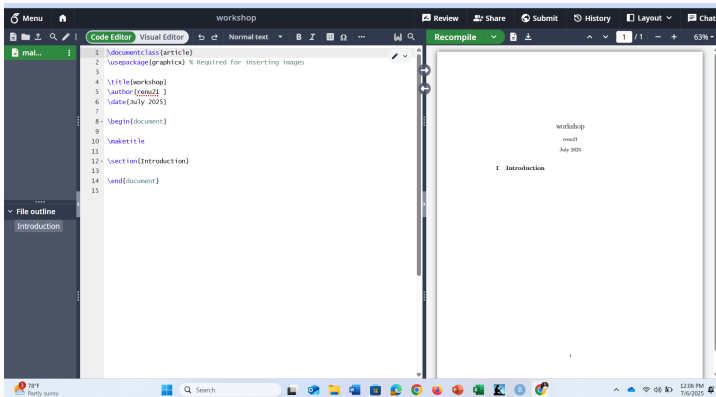

Department of Agricultural and Applied Economics
Virginia Tech

What is LaTeX?

- Powerful Document Preparation System
- Developed by Leslie Lamport in early 1980s upon Donald Knuth Tex typesetting language
- Principle: WYGIWYM (What you get is what you mean) contrast to WYSIWYG (What you see is what you get) approach
- Command-based formatting approach
- Carry .tex extension can be compiled into PDFs

Exercise 1- Create account in Overleaf

- Go to <https://www.overleaf.com/>
- Create a New Project with *documentclass* "article"

- Format your document
 - margin
 - font size
 - font style
 - title, author, date

Exercise in overleaf

Learn by doing: together we will practice to

- Write math equations
- Insert graphs/images
- Draw tables and coordinate based pictures
- Insert citations
- Create slides using Beamer class
- Create poster using Beamer template

- Use Beamer slides for your next presentation
- Explore more
